

ATURA

The next big
thing in plant
proteins

We inspire and enable

the food and beverage industry to sustainably meet the demand for protein-rich, plant-origin diets backed by meticulous science and robust commercial logic.

We offer secure access to new and diversified sources of plant-based proteins, manufactured in Europe to the highest of standards. All backed by validated nutritional and sensory science with expert application support.

Chickpea Protein

Chickpea Protein Isolate is a natural high protein source, rich in BCAAs and produced to the highest standards. The product is clean tasting and made with a gentle process to ensure great product quality.

All of our chickpeas are sustainably grown in Turkey. Manufactured at our own facility in the UK. A high quality protein with an excellent nutritional profile and, offering functional benefits for a range of applications.

FEATURE	BENEFITS
Nutritional <ul style="list-style-type: none">• High in Protein > 80%• High in BCAAs• High in Leucine• High in Essential Amino Acids• Good Digestibility• Low in Saturated Fats	<ul style="list-style-type: none">• Excellent Nutritional Profile• Bioavailable
Functional <ul style="list-style-type: none">• Good Dispersibility• Good Emulsifier• Good Texture & Mouthfeel	<ul style="list-style-type: none">• Suitable for a Wide Range of Applications
Taste & Colour <ul style="list-style-type: none">• Clean Neutral• Pale Tan Colour	<ul style="list-style-type: none">• Ideal for Sweet and Savoury Foods
Label <ul style="list-style-type: none">• Kosher & Halal• Vegan• Allergen Free• Made in Europe	<ul style="list-style-type: none">• Clean Label• GMO Free

Red Lentil Protein

Red Lentil Protein Isolate is a natural high protein source, rich in amino acids and produced to the highest standards. The product is clean tasting and made with a gentle process to ensure great product quality.

All of our red lentils are sustainably grown in Canada. Manufactured at our own facility in the UK. A high quality protein with an excellent nutritional profile and, offering functional benefits for a range of applications.

FEATURE	BENEFITS
Nutritional <ul style="list-style-type: none">• High in Protein > 80%• High in BCAAs• High in Essential Amino Acids• Good Digestibility• Low in Saturated Fats	<ul style="list-style-type: none">• Excellent Nutritional Profile• Bioavailable

Label	<ul style="list-style-type: none">• Kosher & Halal• Vegan• Allergen Free• Made in Europe	<ul style="list-style-type: none">• Clean Label• GMO Free

We simply shape what nature provides into sustainable protein ingredients, backed with science and market know-how.

Crops seeded

We prepare our seeds for processing by removing them from the pods.

Water added

Water is added in preparation for protein extraction.

pH balanced

We adjust pH levels to ensure proteins are soluble.

Milled and classified

Then the seeds are finely ground to flour and separated based on size.

Gently separated

Without heat or shearing, proteins are extracted undenatured.

Spray dried

Each batch is then dried in a spray drier.

Protein precipitation

pH is readjusted to prepare for spray drying.

Packed and ready for market

Our Atura proteins are ready for inclusion in a wide range of formats.

Made to measure

Our sensory, nutrition and application experts empower you to innovate with confidence.
